

Twelve Best Poetry Websites— Interactives and Collections

My students' favorite interactive site recently disappeared from the web after many years. This site below is not the same thing, but I am familiar with some of these items and think it would be worth scrolling through and trying out. I'm always on the lookout for quality interactive poetry sites and would welcome input.

Hopefully someone out there will find a solution. Some other decent options are on this site so I'm leaving it here.
